Education

10/20 — Present **University of Washington**
Seattle, WA Ph.D. in Information Science
Research Interests: Large Multi-modal Models, Reliability, Spurious Correlations, Data-Centric ML
Advisor: Bill Howe

09/15 – 05/19 **University of Michigan**
Ann Arbor, MI B.S. in Computer Science and Engineering

Professional Experience

10/20 — Present **University of Washington**
Seattle, WA Graduate Student and Researcher

06/22 – 09/22 **SONY AI**
Remote Research Intern (Mentors: William Thong, Alice Xiang)

05/18 – 08/18 **IBM Research, Almaden**
San Jose, CA Research Intern (Mentors: Eser Kandogan, Prithviraj Sen, Yunyao Li)

Research Projects

UW **Benchmarking Spurious Correlations in Multi-modal LLMs**
Working on a multimodal benchmark showing that spurious correlation is hard to even the very large proprietary models. Proposed methods to improve model robustness to out-of-distribution spurious correlations.

UW **Improving Robustness to Spurious Correlations with Concepts**
Existing works on spurious correlations require group labels. Introduced a framework that first uses out-of-distribution examples (which can be created with one line of prompt) to infer group labels, then applies robust training methods with the inferred group labels to improve worst-group accuracy.
Accepted to CVPR 2024

UW **Zero-Shot Annotation of Urban Features with LMMs**
Proposed a zero-shot method that leverages Large Multi-modal Modals (LMMs) along with visual prompts (i.e., Set-of-Marks) to annotate urban features such as stop lines and raised tables.
Accepted to SIGSPATIAL 2024

SONY AI **Bias Propagation in Knowledge Distillation for Vision Models**
Showed that fairness properties transfer from teacher to student model via knowledge distillation.
